THE SPECIFICATIONS AND INFORMATION REGARDING THE PRODUCTS IN THIS MANUAL ARE SUBJECT TO CHANGE WITHOUT NOTICE. ALL STATEMENTS, INFORMATION, AND RECOMMENDATIONS IN THIS MANUAL ARE BELIEVED TO BE ACCURATE BUT ARE PRESENTED WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED. USERS MUST TAKE FULL RESPONSIBILITY FOR THEIR APPLICATION OF ANY PRODUCTS.

THE SOFTWARE LICENSE AND LIMITED WARRANTY FOR THE ACCOMPANYING PRODUCT ARE SET FORTH IN THE INFORMATION PACKET THAT SHIPPED WITH THE PRODUCT AND ARE INCORPORATED HEREIN BY THIS REFERENCE. IF YOU ARE UNABLE TO LOCATE THE SOFTWARE LICENSE OR LIMITED WARRANTY, CONTACT YOUR CISCO REPRESENTATIVE FOR A COPY.

The following information is for FCC compliance of Class A devices: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio-frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case users will be required to correct the interference at their own expense.

The following information is for FCC compliance of Class B devices: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment causes interference to radio or television reception, which can be determined by turning the equipment off and on, users are encouraged to try to correct the interference by using one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Modifications to this product not authorized by Cisco could void the FCC approval and negate your authority to operate the product

Cisco Unified Communications Manager Device Package Compatibility Matrix - Current

Published: January 30, 2014

Revised: January 3, 2017

Use this section to obtain the latest Cisco Unified Communications Manager (Unified CM) device packs available for:

- Unified CM 11.5(1)
- Unified CM 11.0(1)
- Unified CM 10.5(2)
- Unified CM 9.1(2)

A device pack introduces new phone types to Unified CM, and it installs the firmware and the configuration files needed to enable features on your Cisco device. New features may be turned off by default and they have attributes or settings that must be configured.

Device packages are available from the Cisco Unified Communications Manager software download page. To obtain a device package, click on the Unified CM device pack link in the table and a new browser window or tab opens. You will need your Cisco login.

Apply a device package to all of your Cisco Unified Communications Manager servers, beginning with the publisher server and the TFTP server.

When you apply a device package to enable new device support, a cluster-wide reboot is not required for Cisco Unified Communications Manager version 11.5(1) or later. Restart the Publisher and the TFTP servers.

If you are using Cisco Unified Communications Manager version 11.0(1) or earlier, a cluster-wide reboot is required. A cluster-wide reboot is not required when you apply a device package to update existing firmware or configuration.

For a release that predates the current release, see the Cisco Unified Communications Manager Device Package Compatibility Matrix - Historical, on page 9.

Cisco Unified IP Phone 3900 and 6900 Series

The following tables list Unified CM device pack available for the Cisco Unified IP Phone 3900 and 6900 Series.

Unified CM device packs contain both configuration files and firmware files.

Table 1: Cisco Unified SIP Phone 3905

CHAPTER 2

Historical Cisco Unified Communications Manager Device Package Releases

- Cisco Unified Communications Manager Device Package Compatibility Matrix - Historical, page 9

Cisco Unified Communications Manager Device Package Compatibility Matrix - Historical

Published: January 30, 2014

Revised: August 24, 2016

Use this section to obtain Cisco Unified Communications Manager (Unified CM) device packs available for:

- Unified CM 10.5(1)
- Unified CM 10.0(1)
- Unified CM 9.1(1)
- Unified CM 9.0(1)
- Unified CM 8.6(2)
- Unified CM 8.5(1)
- Unified CM 8.0(3)
- Unified CM 7.1(5)

A device pack introduces new phone types to Unified CM, and it installs the firmware and the configuration files needed to enable features on your Cisco device. New features may be turned off by default and they have attributes or settings that must be configured.

Device packages are available from the Cisco Unified Communications Manager software download page. To obtain a device package, click on the Unified CM device pack link in the table and a new browser window or tab opens. You will need your Cisco login.

For the latest device pack releases, see Cisco Unified Communications Manager Device Package Compatibility Matrix - Current, on page 1.

Cisco Unified IP Phone 3900 and 6900 Series

The following tables list Unified CM device pack available for the Cisco Unified IP Phone 3900 and 6900 Series.
