Summary

A vulnerability in the Real-Time Monitoring Tool (RTMT) of Cisco Unified Communications Manager could allow an authenticated, remote attacker to download or delete files from arbitrary locations on the filesystem.

The vulnerability is due to insufficient input validation. An attacker could exploit this vulnerability by submitting crafted URL requests to a vulnerable device.

Cisco has confirmed the vulnerability in a security notice and software updates are available.

To exploit this vulnerability, an attacker must authenticate to an affected device. This access requirement decreases the likelihood of a successful exploit.

Affected Products

Customers are advised to consult Cisco bug IDs [CSCuo17302](#) and [CSCuo17199](#) for a complete list of affected product versions.

Vulnerable Products

At the time this alert was first published, Cisco Unified Communications Manager version 10.0(1) was vulnerable. Later releases of Cisco Unified Communications Manager may also be vulnerable.

Products Confirmed Not Vulnerable

No other Cisco products are currently known to be affected by these vulnerabilities.

Workarounds

Administrators are advised to apply the appropriate updates.

Administrators are advised to allow only trusted users to have network access.

Administrators are advised to monitor affected systems.

Fixed Software

Cisco customers with active contracts should contact their Cisco support team for assistance in upgrading to a software version that includes fixes for this vulnerability. Cisco customers without contracts may contact the Cisco Technical Assistance Center at 1-800-553-2447 or 1-408-526-7209 or via email at tac@cisco.com for assistance.

Exploitation and Public Announcements

The Cisco Product Security Incident Response Team (PSIRT) is not aware of any public announcements or malicious use of the vulnerability that is described in this advisory.
