Summary

A vulnerability in the Cisco Unified Reporting upload tool accessed via the Cisco Unified Communications Manager could allow an unauthenticated, remote attacker to modify arbitrary files on the file system.

The vulnerability is due to insufficient client-side validation checks. An attacker could exploit this vulnerability by submitting a malicious POST request to the affected system. An exploit could allow the attacker to implant arbitrary files onto the affected system.

Workarounds that address this vulnerability are not available.

This advisory is available at the following link:

Affected Products

Vulnerable Products

This vulnerability affects Cisco Unified Communications Manager.

Products Confirmed Not Vulnerable

No other Cisco products are currently known to be affected by this vulnerability.

Workarounds

There are no workarounds that address this vulnerability.

Fixed Software

For information about fixed software releases, consult the Cisco bug ID(s) at the top of this advisory.

When considering software upgrades, customers are advised to consult the advisories for Cisco products, which are available from the [Cisco Security Advisories and Alerts page](#), to determine exposure and a complete upgrade solution.

In all cases, customers should ensure that the devices to be upgraded contain sufficient memory and confirm that current hardware and software configurations will continue to be supported properly by the new release. If the information is not clear, customers are advised to contact the Cisco Technical Assistance Center (TAC) or their contracted maintenance providers.

Exploitation and Public Announcements

The Cisco Product Security Incident Response Team (PSIRT) is not aware of any public announcements or malicious use of the vulnerability that is described in this advisory.
