- What's New in the 6.0 Release?
- Resolved Issues in the 6.0 Release
- Known Issues and Limitations in the 6.0 Release

### What's New in the 6.0 Release?

Meet Now	<ul style="list-style-type: none"> <li>• Meet Now is synonymous with One-Click meetings or instant meetings.</li> <li>• To use Meet Now, WebEx Meeting Center and WebEx Training Center users must first set up Productivity Tools. From your WebEx meeting site, go to My WebEx &gt; Productivity Tools Setup.</li> <li>• For users of WebEx Meetings, Meet Now synchronizes with the default meeting settings.</li> <li>• Meet Now is supported in these services: Meeting Center, Training Center, WebEx Meetings, and WebEx Meetings Server</li> </ul>
Mobile users can join a meeting before the host does or before a user joins on a computer	<p>Mobile users can join a meeting before the host or a desktop user, according to the session or site settings. And they can join in any of the following ways:</p> <ul style="list-style-type: none"> <li>• From a meeting link</li> <li>• From My Meetings—the meeting list</li> <li>• By entering a meeting number, whether signed in or not If the host of a meeting is signed in and tries joining the meeting by entering the meeting number, the app validates the user as the host and allows the user to start the meeting.</li> <li>• From the user's WebEx site on the mobile browser</li> </ul>
Google integration (iPad only)	<ul style="list-style-type: none"> <li>• Similar to the Box and Dropbox integrations on iPad, the Google integration allows the mobile users to share files from their Google Drive accounts.</li> <li>• New formats supported: Google Document (e.g., Microsoft Word), Google Presentation (e.g., PPT), Google Drawing (e.g., Microsoft Paint)</li> <li>• Not supported: Google Form</li> </ul>
Wideband audio	<ul style="list-style-type: none"> <li>• Requires WBS29.8</li> <li>• Applies to VoIP portion of hybrid and legacy VoIP sessions within WebEx Audio. Telephony is still using narrowband audio.</li> <li>• If a user joins a WebEx meeting using a version of the meeting application that does not yet support wideband audio, the entire meeting gets downgraded to narrowband audio. Narrowband audio remains for the duration of the meeting even</li> </ul>

	<p>if that user leaves early.</p> <ul style="list-style-type: none"> <li>• Among the services supported by the app, wideband audio applies to Meeting Center and Training Center.</li> </ul>
User interface updates	<ul style="list-style-type: none"> <li>• For Training Center, Q&amp;A and Meeting Info now appear under a “more” menu, represented by three dots.</li> </ul>

### Resolved Issue in the 6.0 Release

CSCup28042	Mobile users who use Z-scaler proxy cannot join a meeting by tapping the meeting link in email invitations or by entering the meeting number.
------------	---

### Known Issues and Limitations in the 6.0 Release

Sign-up screens not centered on iPad	The sign-up screens for Cisco WebEx Meetings Basic accounts are not centered on iPad (CSCum11615).
Training Center breakout sessions and desktop sharing	The app does not support Training Center breakout sessions. If desktop sharing is started in a breakout session, the mobile participants see the desktop sharing even though they are not a part of that breakout session (CSCup51396).
Network-Based Recording	If a mobile user starts a meeting and later joins the meeting on a computer as the host, Network-Based Recording does not function in the meeting.
Polling	If a mobile user starts a Training Center session and later joins the session on a computer as the host, polling does not function in the session (CSCui11400).
Multitasking	<p><b>Background and Scenario</b> A mobile user has joined a meeting and connected to meeting audio by phone. The user multitasks, i.e., putting the app in the background. Within two minutes, a message appears on the screen reminding the user to return to the meeting to remain connected. The user can return to the meeting by tapping the WebEx app on the Home screen.</p> <p><b>Limitation</b> If the user does not return to the meeting after seeing the message, the user may be disconnected from the visual portion of the meeting while remaining connected to the audio portion.</p> <p>The visual portion of the meeting will end for all participants in eight minutes if</p> <ul style="list-style-type: none"> <li>• the host has put the app in the background, and all the other participants have joined only the audio portion of the meeting by phone; and</li> <li>• no one has joined the visual portion of the meeting.</li> </ul> <p><b>Other Details</b></p> <ul style="list-style-type: none"> <li>• If all participants get disconnected from the visual portion of a meeting due to multitasking, they remain connected to audio in the meeting. New invitees can continue to join the meeting by connecting to audio.</li> <li>• If the host gets disconnected from the visual portion of the meeting due to multitasking, the host role will be transferred to a user who has joined the meeting on a computer or to a mobile user who can assume the presenter role.</li> <li>• The multitasking issue does not apply to users who connect to meeting audio using the Internet (VoIP).</li> </ul>
