

# Release Notes for Cisco WRP400 Firmware Version 2.00.30

## August 2012

These Release Notes describe the changes and new features in Cisco WRP400 firmware version 2.00.30.

## Contents

This document includes the following topics:

- [Enhancements](#)
- [Resolved Issues Since Firmware Version 2.00.26](#)
- [Known Issues, page 2](#)
- [Upgrading the Firmware, page 2](#)
- [Related Information, page 3](#)

## Enhancements

The WRP400 can be configured to automatically restart the voice module on a daily or weekly basis to ensure system stability.

Configure this feature on the Administration > System page.

- **Time:** Choose the time of day to perform the maintenance tasks.
- **Day:** Choose to run the maintenance tasks **Daily** or **Weekly**. If you choose **Weekly**, also choose a day from the list.

## Resolved Issues Since Firmware Version 2.00.26

- Fixed an issue in which Dynamic DNS updates were not applied. (CSCtu10294)
- Fixed an issue in which WPS settings were not disabled when Manual mode was selected. (CSCtx65902)
- Modified the default settings to disable WPS, to address security vulnerabilities of Wi-Fi Simple Config, when devices are operated in PIN External Registrar (PIN-ER) mode. (CSCtx65924)

## Known Issues

- There is a power deficiency issue with the broadband modems listed below. These modems draw more power than the WRP400 can supply. The modem may intermittently drop connections or may reboot repeatedly.
  - ZTE MF636
  - Huawei E180
  - Sierra 306, 308, and 312u

**Note:** For a complete list of compatible modems, see the links in [Related Information, page 3](#).
- VLAN support for all outgoing packets is not supported in this release.

## Upgrading the Firmware

- 
- STEP 1** To obtain current firmware for Cisco Small Business products, complete these tasks:
- a. Visit the following URL: [www.cisco.com/go/software](http://www.cisco.com/go/software)
  - b. In the search box, enter: **WRP400**
  - c. Click **Find** to perform the search.
  - d. In the *Select a Software Type* list, click the firmware link.

- e. Click the link for the latest release.
  - f. On the *Release* page, click **Download Now**. Save the file on your computer.
- STEP 2** Start Internet Explorer, and connect to the web-based configuration utility for the router.
- NOTE** The default IP address is 192.168.15.1. When prompted, enter the username and password. The factory default username and password are both *admin*.
- STEP 3** During a firmware upgrade, the router may lose the settings that you have customized. To back up your configuration, complete the following steps:
- a. Click **Administration > Config Management**.
  - b. Click **Backup** to back up the configuration. Follow the on-screen instructions.
- STEP 4** To upgrade the firmware, click **Administration > Firmware Upgrade**.

**NOTE** The service provider may require a separate login before a firmware upgrade. If you see the Username & Password screen, enter the user name and password provided by your service provider. The factory default user name and password are admin. After you enter the user name and password, click **OK**.
