**Date:** May 1, 2015

### FW V3.137 Release Note

#### [New Features]

1. Support of Clock Mode in Screen saver (When Wait time setting is non-zero , but no screen picture configured)
2. Support of disable of FORWARD/DO NOT DISTURB hardkey (controlled by DND\_HARD\_KEY\_ENABLE)
3. Support of logo and wall paper on FB screen
4. Support of Distinctive ring based on incoming caller id
5. Add “access” attribute to each parameter to control the access level in provision configuration file.

The value range for access level includes “A” (admin) and “U” (user).

For example: access=“AU” access=“A” access=“U”

Web and UI configuration displaying will also be based on the access level configuration.

6. Support of pause in dial (2 stage dialing) in one touch.

Comma (“,”) specifies a pause of 2 seconds. For example,

(1) To configure one touch via web as follows: 7001,,,123.

(2) Press one touch (Flexible button view)

(3) Phone would make call to 7001 , and send digit 123 after 6 secs

7. Support of make call via web UI, and see call log from web UI
8. Support of status message in phone UI (Settings->Status Message)
9. Add icon for indication of USB recording
10. Hide call-park and call-pickup from Web UI due to related settings are platform dependent
